

# Capture for PTMS

Quickly scan tax bills and assessment notices into CSC PTMS

CSC Capture for PTMS<sup>®</sup> streamlines the management of tax bills and assessment notices through optical character recognition (OCR) technology that automatically extracts and transfers data into PTMS. By reducing manual data entry and automatically reconciling information with existing PTMS records, Capture helps minimize errors, improve efficiency, and simplify property tax workflows.

## Capture for PTMS makes managing bills and assessments easier. It can help:

### → Reduce errors

Automatically validate tax bills and assessments, while avoiding manual data entry.

### → Save time

Time savings can be used toward other projects.

### → Collaborate effectively

Catalogs scanned tax bills and assessment notices for easy access.

### → Organize complex data

Automatically stores documents with metadata from PTMS for easy search and retrieval.

### → Increase control

Streamline your overall tax management process.

### → Fully integrated platform

Easily search and access documents directly within PTMS through an integrated document library.

## CSC can help

CSC combines industry-leading technology with experienced support to help organizations efficiently manage property tax workflows. Capture for PTMS reduces manual data entry, improves data accuracy, and provides centralized access to critical tax documents, helping teams work smarter and reduce administrative burden.
